DETAILED ACTION / REASONS FOR ALLOWANCE

Remarks

1. Receipt is acknowledged of an amendment in connection with an RCE, which was received on 8/26/2003, which has been placed in the file of record and to which this action is a reply.
2. For the sake of the record, the examiner wishes to make reference to just-issued US 6,616,054, by the instant inventor, which has a specification nearly identical to the instant invention and a common filing date, with slightly different claims.

Allowable Subject Matter

3. Claims 1-3, 6-19, 24 and 39-52 are allowed.
4. The prior art fails to teach or fairly suggest a smart card receiving its power from an external source, wherein there is a portable power supply in wireless communication with the power converter, wherein the portable power supply is external from the smart card reader.
5. Common in the art are teachings wherein power is obtained wirelessly. Saitoh (US 5,929,414) is one notable example. See in particular rectifier 99 in figure 1, which is connected

to the transceiver 56. However, in this case, as with many other examples in the art, the power is supplied by the reader and not from a separate source.
